PRODUCT DESCRIPTION

E series 4.5/5T forklift products are newly developed by Liugong according to the market needs, Newly developed middle tonnage forklift, using a new industrial design and advanced technology, featuring good stability of heavy load, strong power, low fuel consumption, comfortable handling, strong adaptability to working conditions, convenient maintenance, etc., which can be applied to the different working conditions such; wood industry, stone, ceramics, heavy machinery manufacturing, leasing and other industries.

Excellent heavy duty performance
2100mm long wheelbase, high-strength chassis structure, high-strength mast.

Excellent power performance
Powerful engine, engine power upgrade 12% and 39% more torque

High efficiency, low fuel consumption
With a large displacement pump and a load-sensitive hydraulic system, the power loss is reduced, easy lifting at low speeds, strong performance low fuel consumption.

Good maintainability
Most of the maintenance can be done by standing on the ground, and the engine hood open angle is large easy to maintain the engine.

Excellent heavy duty performance
2100mm long wheelbase, high-strength chassis structure, high-strength mast.

Higher reliability and durability
Counter weight designed with double air outlets, good heat dissipation, IP67 protection level of electrical connector, excellent waterproof performance.

Ergonomic Cabin
• Ergonomic cab layout, so the driver does not get tired after a long time;
• 300mm small diameter steering wheel, effectively solve the fatigue.

Large-screen LCD instrument
• 3.5-inch large-screen LCD instrument with rich condition information and clear display.

Steering axle
• The steering axle angle is increased, the oil cylinder is thickened, and the ordinary bearing is replaced with tapered roller bearing with high reliability, the turning radius is small, and the tire loss is less.

Double-air outlets design
• The cooling system is reasonably optimized and adopts aluminum tube and fin fan heaters, independent oil heat dissipation, and large double air outlets, which greatly improves the cooling efficiency, improves the reliability of heavy-duty operation, and ensures the stable operation of key components.

STANDARD CONFIGURATION

Power system	Xinchai China Tier III 4D35ZG31 engine	Electrical systems	Maintenance-free battery	Covering Systems	Standard overhead guard
	Middle exhaust		LED lights		Standard seat
	Tube-fin radiator		Electric horns		Adjustable steering column
	Single air filter		Backup alarm		Anti-slip step plates
Hydraulic system	2-Function control valve	Masts/attachments	3.0M Standard 2-stage	Chassis	Electric shift
	Priority hydraulic power steering		Tilt cylinder angle (6°/12°)		Drive axle
	Lift speed limiting valve		Fork carriage wide 1.38m		Steering axle
	Tilt self-locking valve		Forks 1070mm		Pneumatic air tires
	Explosion-proof valve for lifting oil hoses				Traction pin
	Hydraulic oil suction filter				
Hydraulic oil return filter					

Optional Configuration

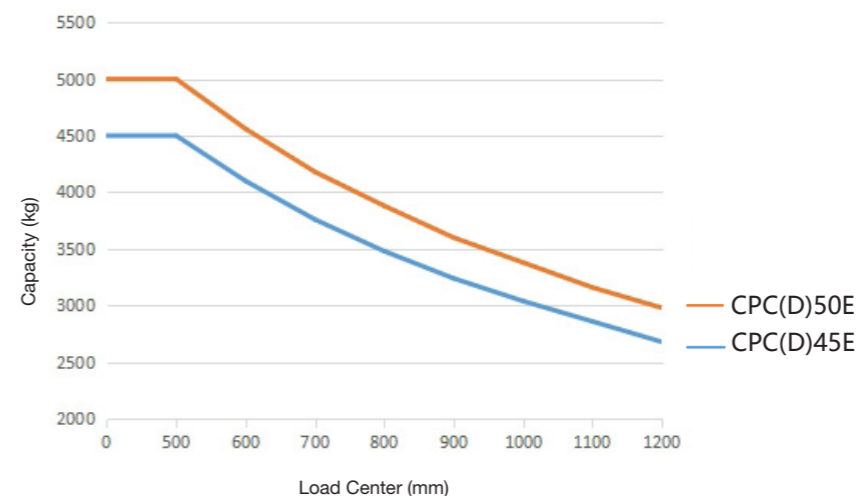

Power system	Xinchai EU / Tier V 4E30YG52	Electrical systems	Air conditioning and heating	Covering Systems	Overhead guard (Lower 100mm than standard)
	Elevated air pre-cleaner		OPS system		Enclosed cab
	2nd refined air filter		Amber warning light		Half-suspension vinyl seat
	Oil-bath air filter		license plate light		Full-suspension vinyl seat
Hydraulic system	3-Function control valve (without hose group)	Masts/attachments	3-6 M Standard 2-stage	Chassis	Grammer full-suspension vinyl seat
	3-Function control valve (with 3rd function hose group)		4-6M Full free 3-stage		Solid tires
	4-Function control valve (without hose group)		Forks 1070mm		Non-marking solid tires
	4-Function control valve (with 3rd & 4th function hose groups)		Forks 1220mm		Dual air filled pneumatic tires
			Forks 1370mm		Dual solid tires
			Forks 1670mm		Solid tires with shock holes (Deflector Holes)
	Forks 1820mm				
	Forks / 1970mm/ 2120mm/ 2440mm				

MAST AND CAPACITY INFORMATION

Note:
Vertical axle stands for load capacity while horizontal axle stands for load center, Load center is the distance counted from the front of the fork. The base point of the standard load is the center point of the cubic with the same 1000mm dimension in length, width and height. The load capacity should be down if mast tilt forward or using non-standard forks of loading goods with extra width. Please realize the different load capacity between different load centers according to load chart.
